VSOP AO2 PROPOSAL COVER SHEETS

DEADLINE : 8 May, 1998
SEND TO : VSOG, ISAS, 3-1-1 Yoshinodai, Sagamihara, Kanagawa 229-8510, JAPAN

Please read Appendix C of Announcement of Opportunity for details on how to fill in this Cover Sheet.

(1) Date prepared : 30 April 1998

(2) Proposal title : The Low Frequency Structure of the NGC 1052 Jet

(3)	INVESTIGATORS	INSTITUTION
P.I.	M. J. Claussen	NRAO, USA
co-I.	J. Ulvestad, P. Diamond, J. Braatz	NRAO, USA
co-I.	A. Wilson	University of Maryland, USA
co-I.	C. Henkel	MPIfR, Germany

(5) Proposal Abstract :

We propose two-epoch 1.6 and 5 GHz observations of the elliptical galaxy NGC 1052, which contains a two-sided radio jet tens of milliarcseconds (several parsecs) in length. Two regions of 22-GHz water maser emission are seen in its western jet, elongated along the jet rather than along the axis of the putative accretion disk. An apparent gap at the nucleus at frequencies $\leq$ 22 GHz is probably due to strong free-free absorption. Free-free absorption at frequencies of a few gigahertz is also likely to be present at the position of the masers, but only VSOP has the resolution to map out the locations of the absorbing gas at 1.6 and 5 GHz. The VSOP data will be used with our continuing 22-GHz VLBA observations of NGC 1052 to study the absorption, constrain the models of the maser excitation, and look for relative motions of the VLBI components.

(6) Proposal Category (indicate all that apply):

Object type:

☑ AGN, ☐ Maser, ☐ Stellar, ☐ Pulsar, ☐ Other :

Observation type:

☑ Continuum, ☐ Spectral Line, ☐ Polarization, ☑ Time-critical, ☑ Other : 2-epoch monitoring

(7) Number of proposed experiments

An 'experiment' is one or more observations of one source at a fixed HALCA set-up. A request to observe the same source at 1.6 GHz and separately at 5 GHz requires two columns to be filled in in item (8) below. A request to observe the same source with HALCA simultaneously observing at 1.6 GHz and 5 GHz requires one column to be filled in. Multi-epoch observations of the same source at the same frequency – a 'monitoring experiment' – requires only one column to be filled in. Suggested observing dates, especially for for time-critical and monitoring experiments, should be specified in item (10).

The number of experiments in this proposal is: 2

(8) Details of proposed experiments

	Experiment 1	Experiment 2	Experiment 3	Experiment 4
Source name (J*hhmm*±*ddmm*)	J0241-0815	J0241-0815		
Alternative name	NGC 1052	NGC 1052		
RA(J2000) (hh mm ss.ssss)	02 41 04.79854	02 41 04.79854		
Dec(J2000) (dd mm ss.ssss)	-08 15 20.7513	-08 15 20.7513		
Observing frequency band (GHz)	1.6	5		
Continuum observations:				
Standard VSOP freq. channels?	☑	☑	☐	☐
Channel A range (MHz)				
Channel B range (MHz)				
Spectral line observations:				
Ch.A spectral line rest freq. (MHz)				
Ch.A LSR velocity (km/s)				
Ch.B spectral line rest freq. (MHz)				
Ch.B LSR velocity (km/s)				
FWHM of field of view required (mas)				
Min. spectral channels per IF channel				
Correlator averaging time (sec)				
No. of correlating passes (if >1)				
Total flux density (Jy)	1.5	2.4		
Correlated flux (mJy)	300	300		
Ground Radio Telescopes:				
Suggested array given at Item (10)?	☑	☑	☐	☐
GRT observing mode:				
128Mbps LCP (standard)	☑	☑	☐	☐
128Mbps LCP/RCP	☐	☐	☐	☐
256Mbps LCP/RCP	☐	☐	☐	☐
Preferred correlator:				
No preference	☐	☐	☐	☐
Mitaka	☐	☐	☐	☐
Penticton	☐	☐	☐	☐
Socorro	☑	☑	☐	☐
Monitoring programs:				
Number of observations	2	2		
Mean interval (days)	180	180		
Related AO1 proposal code(s)				

(9) VSOP spacecraft observing mode (see Section 3 and Table 5 of the VSOP Proposer's Guide):

☑ 2 channel x 16 MHz, 2-bit (Standard mode),

☐ Other:

Phase calibration tones:

☑ On (Standard continuum mode),

☐ Off (Standard spectral line mode)

(Include justification of any non-standard choice at (10) below)

(10) Additional notes to the scheduler :

Suggested array is VLBA, for combination with contemporaneous 22-GHz VLBA data, to be proposed separately.

(11) Attach a scientific and technical justification, not in excess of 2 pages of text and 2 pages of figures. Up to one page of (u,v) plots per source may optionally be included.
(Refer to the VSOP Announcement of Opportunity for detailed instructions.)
Preprints and reprints will not be forwarded to the Scientific Review Committee.

Send two paper copies of the complete proposal to:

VSOP Observing Proposals
VSOP Science Operations Group
Institute of Space and Astronautical Science
3-1-1 Yoshinodai, Sagamihara
Kanagawa 229-8510 JAPAN

In addition, e-mail the completed LaTeX file to submit@vsop.isas.ac.jp

Information from the Cover Sheets of scheduled proposals will be made available from the VSOP WWW site.

Proposals must be received at ISAS by 8 May 1998
